

Turns your tablet into a professional-level scan tool with ALLDATA built in – and unlimited pre/post scans*

ALLDATA built-in

- Codes link directly to relevant articles and probable cause data – there's no punching out to a separate browser or application

Professional

- Retrieve and clear manufacturer P, B, C, and U codes
- Conduct full-system vehicle DTC scans with exportable pre- and post-scan reports
- Read and graphically display PIDs – record and play back live data
- Perform bi-directional component control

Affordable

- Unlimited pre- and post-scans – no per-scan fee
- No upfront cost for hardware
- No charge for software/data updates

Portable

- Connects to the OBDII port and links via Bluetooth to your tablet
- Run vehicle scans on your phone**

* ALLDATA Diagnostics requires a subscription to ALLDATA Collision or ALLDATA Repair.

** iOS and Android compatible devices available with limited scanning capabilities.

The industry's #1 collision repair software

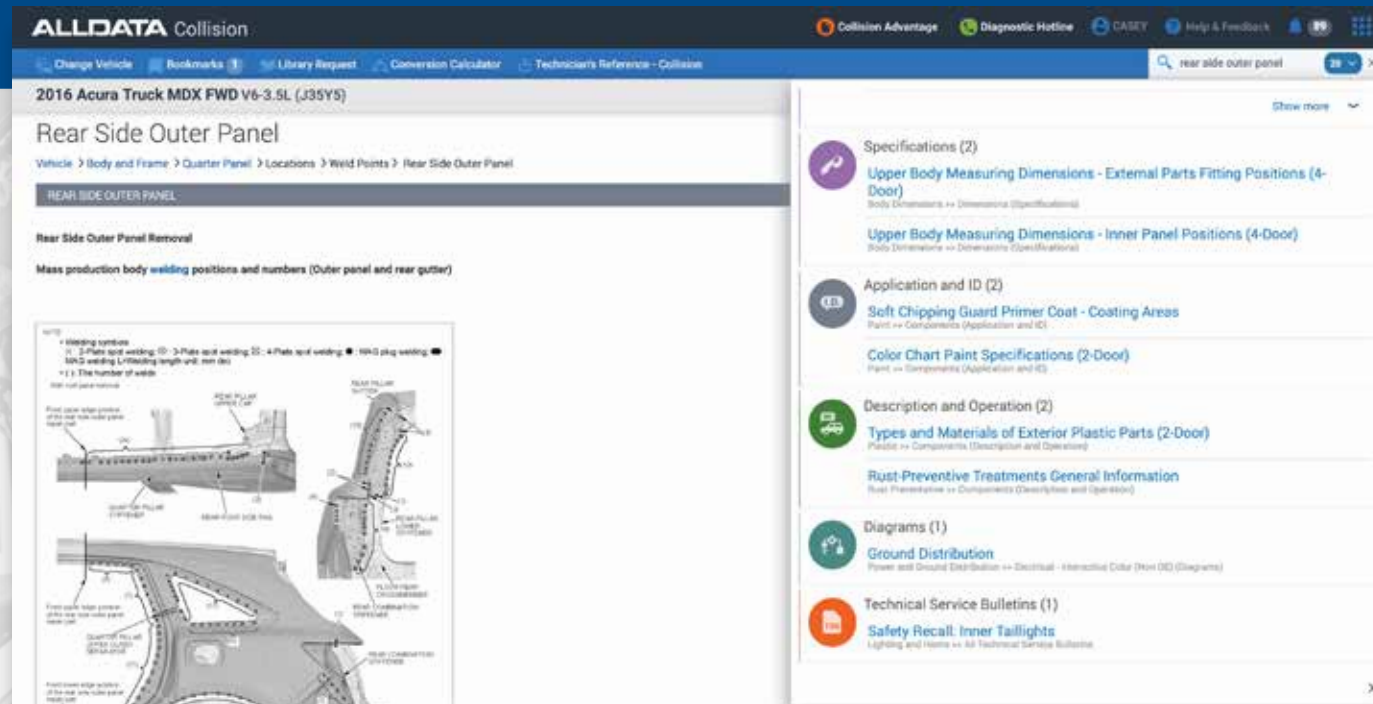

“With the push toward pre and post scanning ... ALLDATA [Diagnostics] allows us to have access to the information we need, And it's completely portable.”

ALLDATA.com

All the information you need for OEM-accurate vehicle repair and liability protection, right at your fingertips

- Instant access to the industry's most complete and up-to-date OEM collision repair information – with coverage for 95% of vehicles on the road today
- Collision OEM procedures such as sectioning and structural repairs handling of new materials, panel replacement, sensors, and more
- **NEW** ADAS Quick Reference links directly to ADAS systems, components, and locations with basic calibration information, required tools, and servicing prerequisites
- Full mechanical procedures: TSBs, diagnostic, repair procedures, and more for reduced sublets
- 300,000+ interactive color wiring diagrams (in addition to OEM diagrams)
- Support from the ALLDATA Library team for hard-to-find OEM data

5 stars, 2 thumbs up, 10 out of 10.
Will 100% recommend to any of my colleagues in the automotive repair industry.

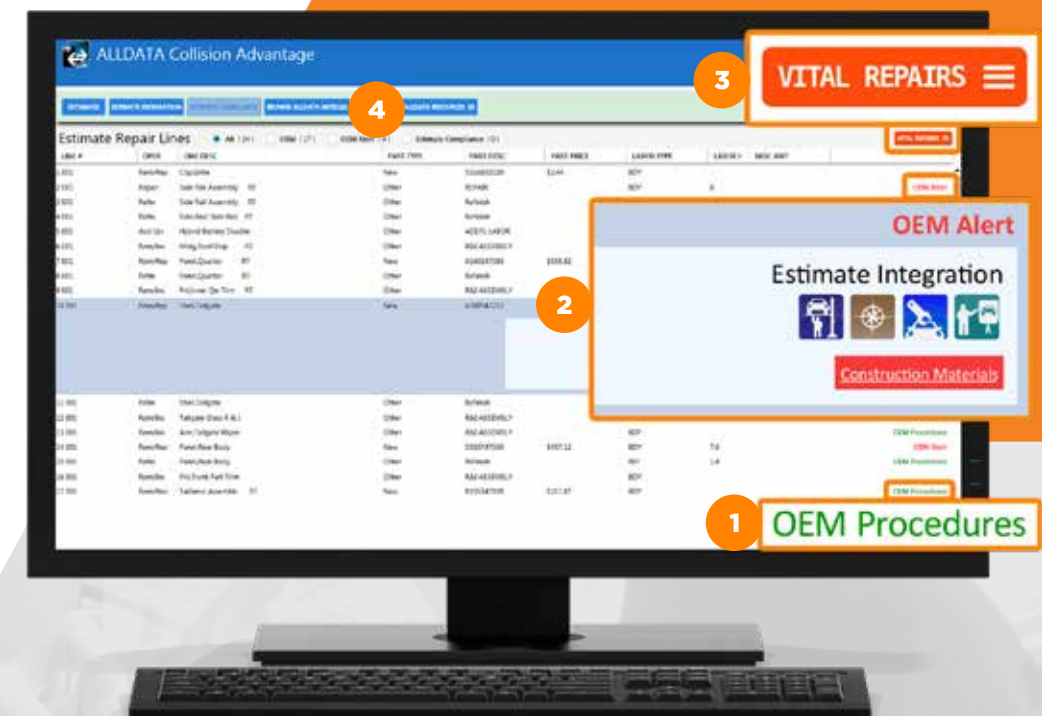

TONY BENKE
OWNER, DIETRICH'S COLLISION

Never miss a required repair!

ALLDATA Collision Advantage integrates with ALLDATA Collision to scrub your estimate so it's OEM accurate and complete the first time. It works with the three major estimating systems and displays:

- OEM Procedures** – Graphic icons indicate available OEM information, including TSBs, DTCs, service precautions, specifications, diagrams, paint codes, locations, and more.
- OEM Alert** – Line-by-line red OEM Alerts plus pop-up notifications ensure you're repairing vehicles back to factory specifications, helping to limit your shop's liability.
- Vital Repairs** – On each estimate, "Vital Repairs" describe the OEM-specified inspections and repairs required after a collision, including high voltage system disable/enable.
- Manufacturer Position Statements** – One-touch access to the latest vehicle-specific OEM manufacturer position statements.

Collision Advantage provides great documentation. I can search OEM position statements – nearly all of them require scanning – print that out with the estimate and get paid for it.
